# Our Purpose

Why we exist, why we do it & what we do?

# WE MANUFACTURE MATERIAL THAT MAKE THE WORLD

### **About Hindalco**

Hindalco Industries Ltd.

#### **Integrated Aluminium**

- Alumina 3.9 Million TPA
- Primary Aluminium 1.3 Million TPA
- VAP 481 KT

#### **Copper Major Player in India**

- Copper Cathode 376 KT
- DAP 301 KT

#### **Aluminium Downstream**

#1 Rolled Product Supplier Worldwide

- Shipments 3.1 MT
- Global leader in aluminium recycler
- Focused on premium segment

Novelis
Largest
aluminium FRP
producer globally

Aditya & Mahan

1st quartile cost
producer of
Aluminium

Utkal amongst the lowest cost producers of Alumina

One of the largest custom copper smelter at single location in Asia

Global operations across

11 countries

Revenue of USD 17 billion

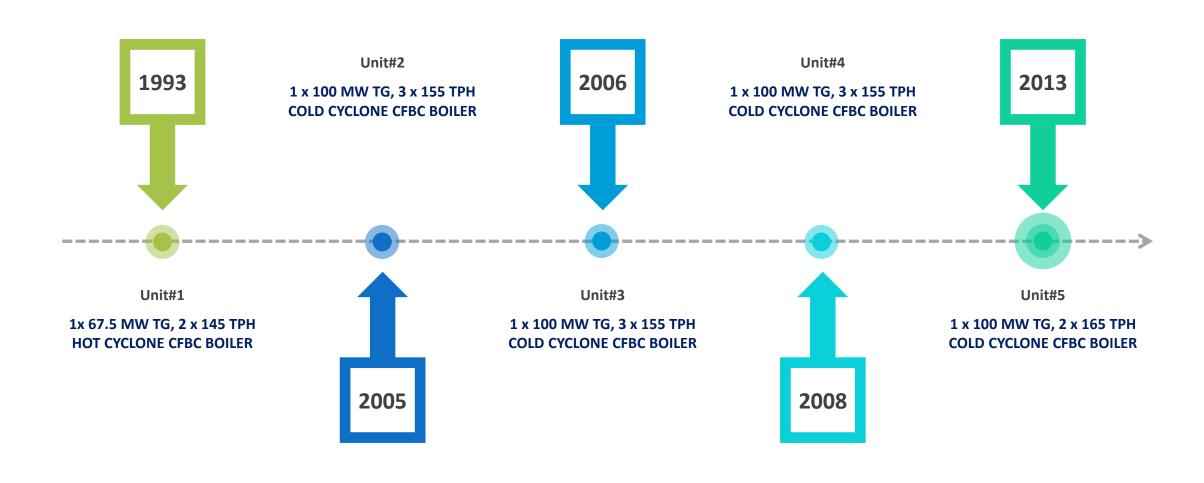

EBITDA of USD 2.2 billion

~35,000 employees across the world

# **Journey So Far**

# First Ever @ Hirakud

First in World (In 85 kA) to use copper in cathode lining

First in India to provide Aluminum for Hindalco's Bulkler & Freight Trailer

First CPP in Asia to install environment friendly CFBC boiler.

First CPP in India to operate complete dry ash management & disposal system

First in India to install RO based ETP

First in state for installing state of Art Polycrack Machine which converts Oil from Waste

First Time State Of The Art Technology Installed At Hirakud Smelter For Recovering Of Aluminium From Dross(hw)

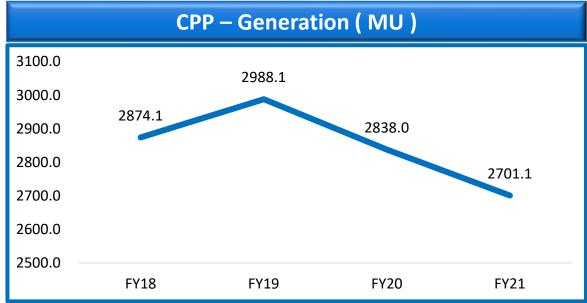

First in ABG group to install HFTR in ESP for emission Control

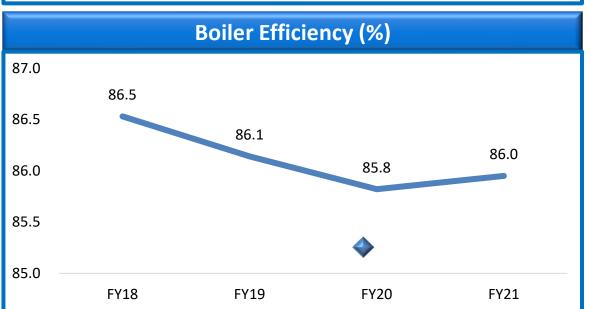

First in State to install online HF & ambient air monitoring system

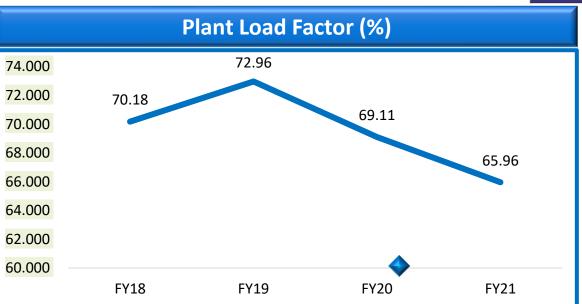

1<sup>st</sup> in Hindalco Aluminum Business to achieve ISO – 50001 Certification.

7	Unit # 1 BFP replacement with energy efficient pump and Motor(1 no)	Rajeev Ranjan / Deepak Singh	2.2	180	Mar′23
	Annualized Savings:		6.16	688	

# **Proposed APC:**

In the Current FY, We have Proposal to:

Execute 6 nos of Major Energy Savings Projects.

Reduce Overall Absolute Energy Cons by 508 kW i.e. by 0.16 %

Invest Rs 3.96 Crs in achieving improvement in APC.

# Short Term: Heat Rate Improvement Initiatives

SI No	Initiatives	Expected Improvement in Heat Rate	Execution Month	Remarks
1	Unit-4 Short Shut down for Auxiliary Maintenance & execution of Condenser Water Jet Cleaning, HPH-5 short circuit rectification & HPBP Passing Issues & rectification	10.1	20 <sup>th</sup> Aug – 30 <sup>th</sup> Aug	Under Progress
2	Unit-5 Short Shut down for Auxiliary Maintenance & execution of Condenser Water Jet Cleaning & HPBP Passing Issues & rectification	21.0	2 <sup>nd</sup> Sept-10 <sup>th</sup> Sept	
3	Unit-3 Short Shut down for Auxiliary Maintenance & execution of Condenser Water Jet Cleaning, HPBP Passing Issues & rectification and HPH-4 Short Circuit Rectification	17.4	15 <sup>th</sup> Sept – 25 <sup>th</sup> Sept	
4	Capital Overhauling of TG-2	116	Oct'21 – Nov'21	
5	Capital Overhauling of TG-5	54	Feb – Mar'22	
	Annualized Savings	218.5		

# Glimpse: TG-1 Renovation & Modernization

Existing Turbine is Impulse Reaction Turbine which has 1 Control Stage & 43 Reaction Stages comprising of HP Flow in one direction & LP flow in Reverse direction.

Proposed Turbine will be fully ( 44 Stages ) Reaction turbine to increase Isentropic Efficiency.

The Reaction type blades will help to lower rates of water droplet erosion since steam velocity and the extent of steam deflection are relatively low.

The exiting 1<sup>st</sup> stage Partial Arc Steam admission section will be modified to Full Arc Steam admission for minimizing of throttling losses leading to improved Efficiency & better Heat Rate.

The New Design will facilitate improved Steam flow path clearances by using New Sealing arrangements i.e. Brush Seal.

# Glimpse: TG-1 Renovation & Modernization

Unit-1 Existing 67.5 MW Turbine Rotor

Unit-1 Proposed 77 MW Turbine Rotor

# Long Term: Heat Rate Improvement Initiatives

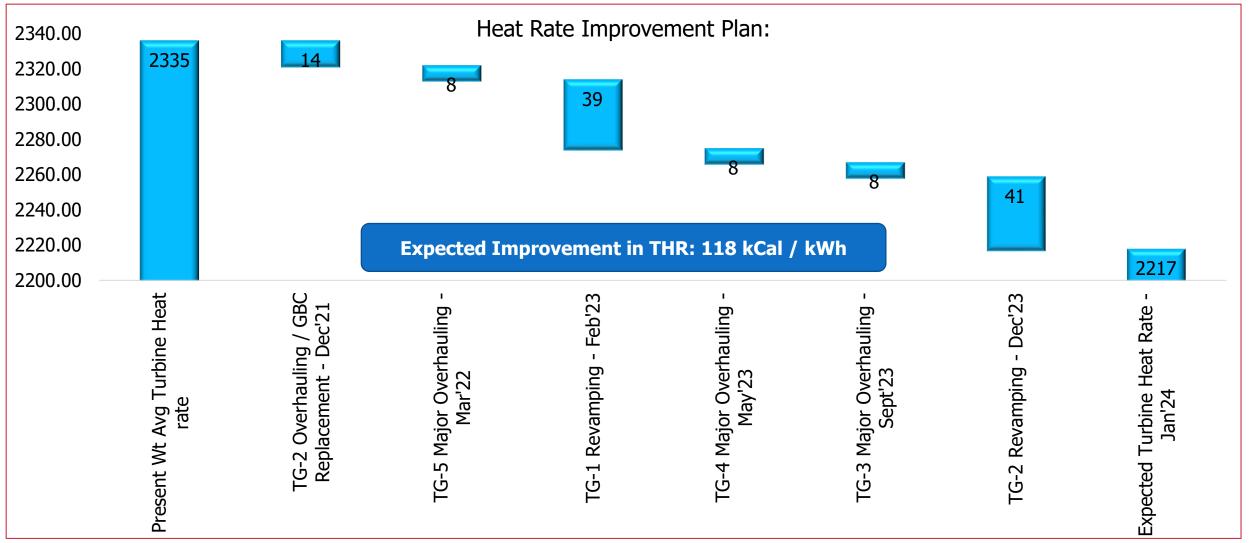

S.N	Unit	Activity	Target Date	Capital Investment (Rs in Crs)	Expected Heat Rate (After MOH and R &M)
1	TG #2	Major Overhauling	Oct-Nov'21	9.97	2291 Kcal/Kwh
2	TG #5	Major Overhauling	Feb'22	7.63	2290 Kcal/Kwh
3	TG#4	Major Overhauling	Oct'22	5.5	2295 Kcal/Kwh
4	TG#3	Major Overhauling	Oct'23	5.5	2250 Kcal/Kwh
5	TG#1	Renovation & Modernisation	Feb'23	40.0	2146 Kcal/kwh
6	TG#2	Renovation & Modernisation	Jan'24	50.0	2145 Kcal/Kwh

# **Expected THR:**

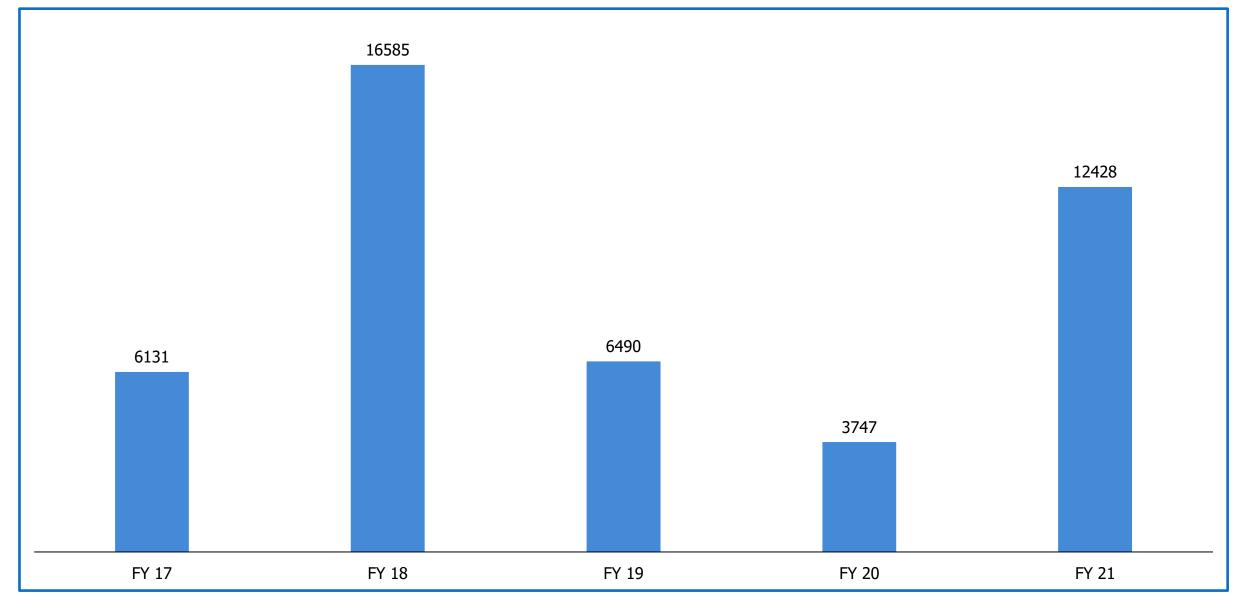

Expected Plant Heat Rate by Jan'24: 2569 kCal / kWh.

# Use of Alternative Fuel – Rice Husk (MT / Annum)

### Innovative Project: Addition of ECO-1 Coil in Blr-12 & 13

#### **Introduction:**

Unit#5, 100 MW unit had been commissioned in June 2013. There are 2X 165 TPH CFBC Boilers (Boiler#12 & Boiler#13) are feeding steam to 100 MW TG set. These two Boilers are connected to Unit#4 Boilers through Feed Water as well as steam side interconnection. Since commissioning, both the Boilers (Boiler#12 & 13) were having high dry flue gas temperature (155-162 Deg C) while leaving Air Heater of Boiler. This was resulting in high dry flue gas loss in Boiler efficiency and causing more coal

consumption compared to other Boilers.

	Technical Details		
S. N	Parameters	UOM	Boiler#13
1	Make		CFBC
2	Туре		Cold cyclone
3	MS Flow	TPH	165
4	MS Temp @ Boiler outlet	Deg C	515
5	MS Pressure @ Boiler outlet	Kg/cm2	90.2
6	Flue gas Temperature @ AH Outlet (Design)	Deg C	140
7	Flue gas Temperature @ AH Outlet (Actual)	Deg C	155-162

#### **Project Description**

HIL Technical Team started discussion with OEM i.e M/s TKIIPL to resolve the high temperature of exit flue gas from Air heater. In spite of several efforts from both HIL and TKIIPL teams, the issue could not be resolved. Then Technical Team suggested M/s TKIIPL to check the posibility of adding extra ECO-1 coil in both the Boilers. The suggestion was based on study of water, steam and flue gas temperature profile study and finding space availability in Economiser block. After several technical discussions, M/s TKIIPL agreed to adding extra ECO-1 coil to the Boiler #12 and Boiler#13.

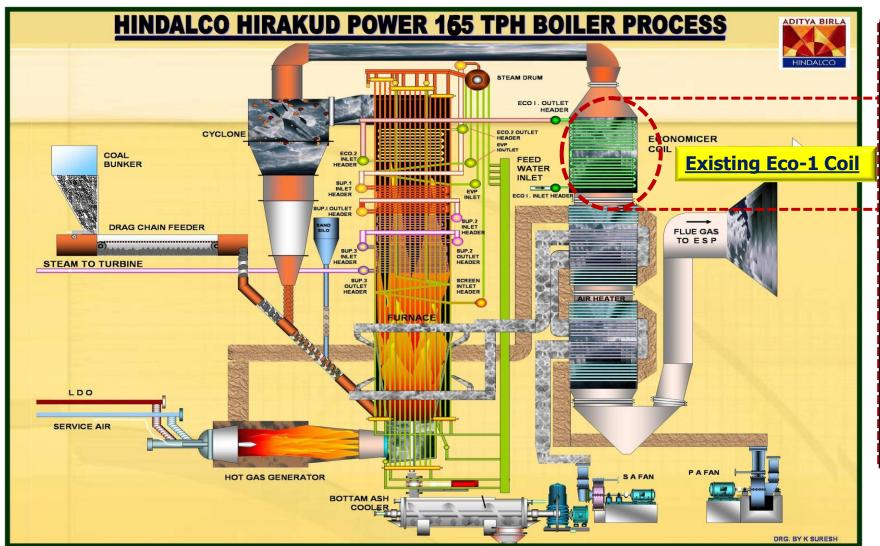

#### **Project Execution:**

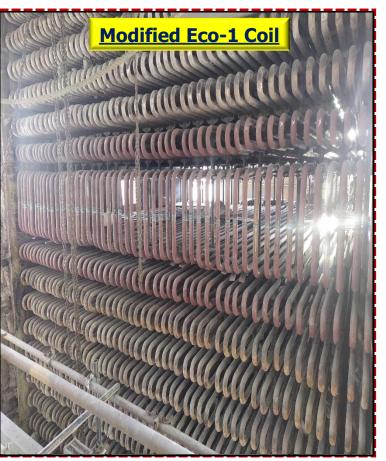

Based on successsful techno-commercial discussion, the PO was placed to OEM i.e M/s TKIIPL to add extra ECO-1 Coil to the Boiler #12 and Boiler#13 through PO No. P/PO/NBN/1920/0095 and P/PO/SRV/1920/0809dt 23Dec 2019 and 30th Dec 2019 respectively. According the Coil addition was done during the planned overhauling of Boiler#13 from 22nd Dec 20 to 19th Jan 21.

# Innovative Project: Addition of ECO-1 Coil in Blr-12 & 13

Addition of ECO-1 Coil in Boiler#12/13 for reduction in Back End Temp.

### Innovative Project: Addition of ECO-1 Coil in Blr-12 & 13

### (Considerations: @ Same Load @ 159 TPH, GCV / Moisture Corrections.

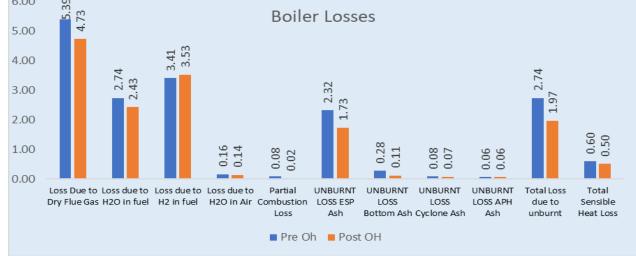

- APH exit Flue gas temperature reduced to 143 Deg C from 157 Deg C.
- Dry flue gas loss reduced by 0.67 %.
- The dry flue gas loss for before coil addition was 5.39 % which was higher than design dry flue gas loss of 4.43%. Now, dry flue gas loss reduced to 4.73 % which is nearer to design value.
- $\circ$  The unburnt carbon loss in fly ash was (2.32 %) on the higher side as compared to design loss (1.43%). After overhauling, the loss reduced to 1.73 %.

Overall Boiler Efficiency increases by **1.31** % in which contribution of Coil addition is **0.67** % whereas contribution of overhauling is **0.64** %

- APH Leakage is satisfactory.
- Benefits in Power consumption by 153.6 KW.
- Overall Heat Rate Improvement by 21.05 kCal/kWh.

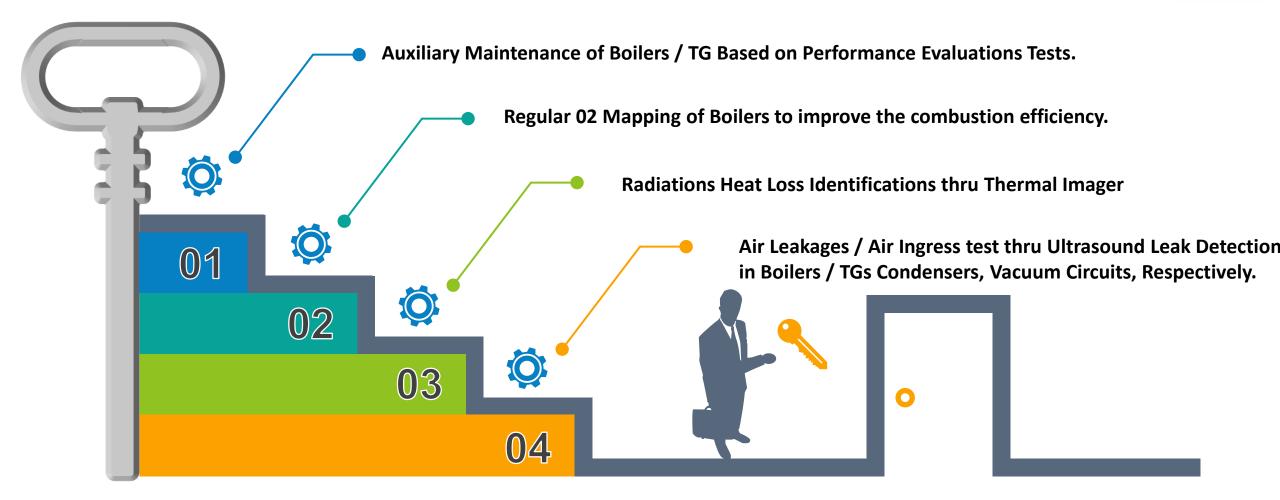

#### **Financial Gain:**

- Saving due to improvement in Boiler efficiency by
   Eco-1 Coil addition: Rs 0.79 Cr
- Saving due to improvement in Boiler efficiency by Overhauling Rs. 0.75 Cr.
- Saving due to reduction in Aux. Power consumption:
   Rs. 0.48 Cr.
- o Total Saving: Rs. 2.02 Cr/ Annum.

Planning to Replicate in Unit-3
Boiler-6,7 & 8 were APH O/L Temp
are 145~150 Deg.C

#### **Performance Evaluations based Auxiliary Maintenance of Boilers**

- Boiler-12 was recommended for Auxiliary Maintenance Post PG Test & APC Performance.
- 2. Planned shut down from 5<sup>th</sup> Nov 21<sup>st</sup> Nov for Auxiliary Maintenance Activities.
  - 574 nos of damaged tubes replaced due to leakage.
  - ATT Post Aux Maintenance & rectification of identified air ingress / leakage points.
  - Reduction in Air Ingress Across APH by 0.69%
  - Benefits: Reduction in APC by 188 kW.

## Road to Rail:

Coal unloading platform developed and the siding notification for coal unloading obtained in 2018.

Controlling measures by reducing the road transportation.

We started our Coal Transportation through Railways since 2018 as per below.

<u>Years</u>	Nos of Rake	RR Onty in MT	Reduction of Trucks on Road
2018	8	31440.79	1048
2019	64	249912.350	8330
2020	49	189976.700	6333
2021	51	195083.00	6502
	TOTAL	676,411.00	22,213

<b>Total Qty dispate</b>	hed [QTY]	Mt	22834
1st Scenario	From Hirakud to Vizag [A]	Per Mt	2580
	Loading Charges at Hirakud [B]	Per Mt	30
	Hirakud to Vizag [C = A+B]	Per Mt	2610
	Total Inland Freight [C x QTY]	Rs.	5,95,97,995
	From Hirakud to Aditya [A]	Per Mt	326
	Loading Charges at Hirakud [B]	Per Mt	30
	Unloading Charges at Aditya [C]	Per Mt	41
2nd Scenario	Stuffing Charges at Aditya [D]	Per Mt	120
Ziiu Scenario	Container Lashing [E]	Per Mt	14
	From Aditya to VZP/KOL [F]	Per Mt	1195
	Hirakud to Vizag [G = A+B+C+E+F]	Per Mt	1726
	Total Inland Freight [G x QTY]	Rs.	3,94,12,314
<b>Total Inland Freig</b>	Rs.	2,01,85,681	

#### **Road to Rail: Benefits & Impacts**

HINDALCO

- Prevented loss of sale of material worth Rs. 310.073Cr.
- Ensured customer satisfaction by fulfilling customer requirements.
- Delivered 100% accuracy with nil customer complaints.
- Non interrupted production at Hindalco Hirakud.
- Total Qty. Dispatched: 22834mt(914Nos of Containers).
- Total inland Freight Saving Approx. 2Cr.
- Coal Cess Refund 15.45Cr.
- Safe delivery of material to Export customer.
- Reduction in overall process time.
- Error free documentation process.
- Safe handling of material.
- Easy to access & Reduced vehicle movement inside FG Yard.

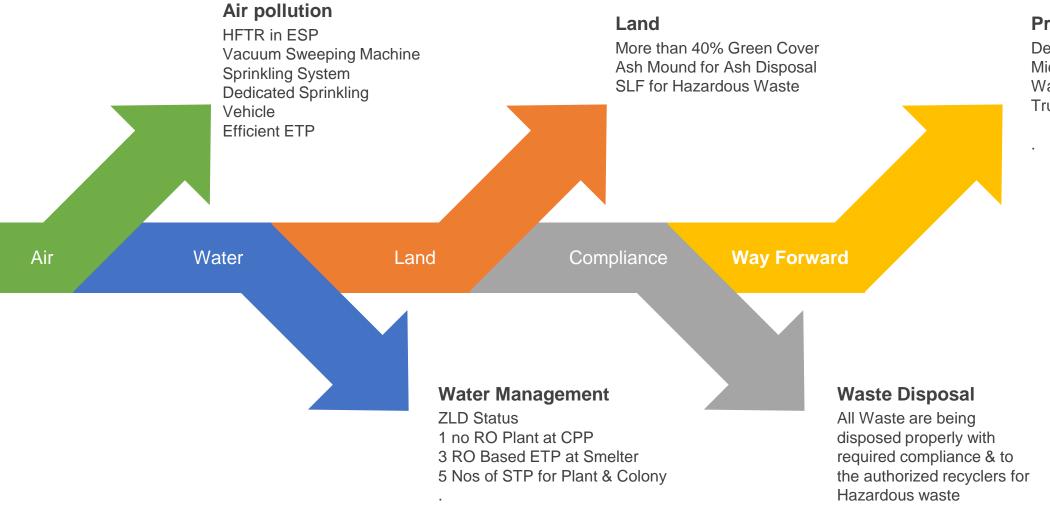

- Accuracy in movement of required material as per Customer.
- Reduction in Container Ageing.
- Improved responsiveness in the system.
- Understood the dynamics of complexity of varying practices in transportation.
- Estimating / anticipating the test conditions and Handling with strategy.

**BENEFITS** 

**IMPACT** 

#### **Environment Initiatives**

#### **Projects**

Desox System at CPP
Micro Pulse System for ESP
Water Audit & Compliance
Truck Mounted Vacuum m/c

#### Green Cover - Ash Mound

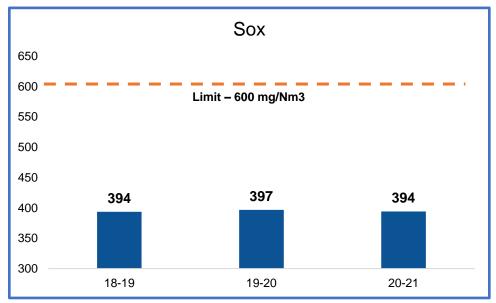

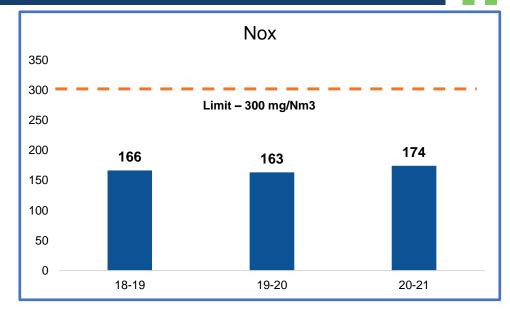

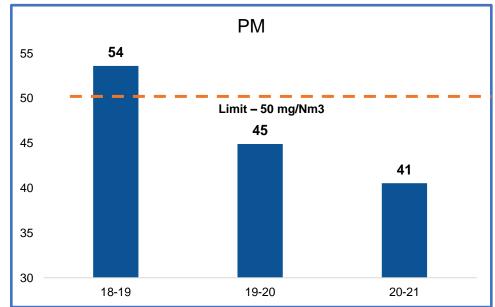

## Emission Level @ Hirakud

#### **Pollution Control Measure**

Water Pollution Control S	System adopted
---------------------------	----------------

- ➤ CPP RO plant 120 m3/hr
- $\triangleright$  Effluent Treatment Plant Installed RO based 2×250KLD and 1 × 50KLD
- ➤ Sewage Treatment Plant Installed(P&S) 1×100KLD, 1×500KLD,1×300KLD, 1×400KLD
- > Zero discharge concept adopted in non-monsoon period, as per CTO.
- Online effluent water monitoring system with Real Time Data communication to SPCB & CPCB sever.

Air Pollution Control System adopted

> 13 ESP in which 11 Boilers are fitted with HFTR technology to control Emission

#### **Environmental Monitoring System**

Online emission monitoring system installed in all stack with Real Time Data communication to SPCB & CPCB sever

5 nos of Continuous Ambient Air Quality monitoring System (CAAQMS) installed in Smelter & Power complex with Real Time Data communication to SPCB & CPCB sever.

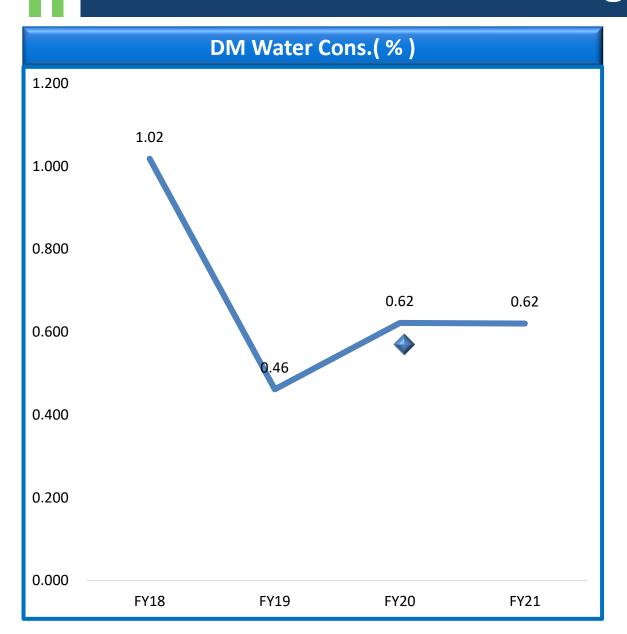

10 nos of Continuous Emission monitoring System (CEMS) installed in Smelter & Power complex with Real Time Data communication to SPCB & CPCB sever.

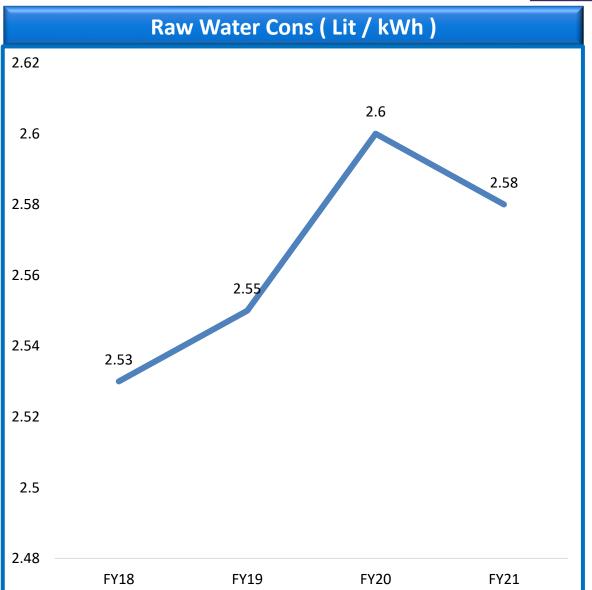

6 EQMS (Effluent Quality Monitoring System) installed in Smelter & Power complex with Real Time Data communication to SPCB & CPCB sever.

2 nos. Mercury Analyzer installed in CPP

#### **Environment Management - Water**

#### Water Saving Initiatives:

Pipe line laid to divert PSF,ACF vessel Back Wash water in DM plant to Cooling Tower -1 & 2.

Water Saving: 62. 7 Cum / Day.

RO Based ETP plant to treat effluent from cooling tower blow down and recycle as make up to cooling tower thus reducing fresh water drawl from river. Water Saving: 1200 Cum / Day.

RO reject water with high total dissolve solids (TDS) content is utilized in Ash conditioning and dust suppression.

Water Saving: 160 Cum / Day.

One pipe line from Main colony & CPP Colony Sewage treatment plant (STP) are laid to Cooling tower # 2 to recover STP treated water instead. Water Saving: 750 Cum / Day.

Pipe line laid to provide cooling tower blow down water for Plant and colony gardening, Brick plant, Plant Road spray inclusive ash mound requirement etc as measures of recycling waste water. Water Saving: 2448 Cum / Day

Increasing Cooling Tower Cycle of concentration from (COC) 4 to 6 with suitable chemical treatment to reduce blow down and make up water requirement. Water Saving: 1872 Cum / Day

mentioned Initiatives:6 Cum Day i. **Total** 

#### Environment Management – Water Management

We have taken following initiatives to conserve water which ultimately resulted in reduction in specific water consumption-

Modernization of our 2 RO based ETPs of having capacity 250 KLD & 50 KLD

Upgradation of RO stream & UF stream of CPP RO plant of capacity 120 m3/hr

Utilization of blow down water instead of clarified water in Gardening/Dust Supression

Construction of Nalgonda pit for pre treatment of water

Utilization of RO reject in ash quenching/conditioning

Water Rationing concept adapted by internal Task Force

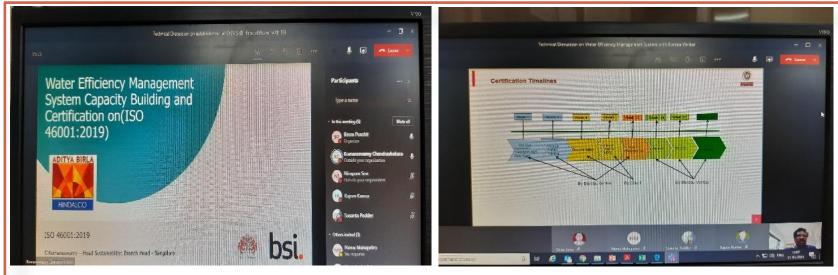

Equipment/ System	History	Current Status	Way forward
Raw Water System	Chamber and water flows through	1000 - 1050 and just sufficient to	<ol> <li>Receiving end pumping station need to be completed which can bring 1400 m3/Hr water by flooded suction.</li> <li>Third raw water pipeline needs to be completed</li> </ol>

#### Water Management System:

#### ISO 46001: 2019 (Water Efficiency Management System):

- > Scope of Work Finalization
- > Timeline finalization
- Technical Discussion done with BSI & BVIL

Technical Discussion along with "British Standard Institution (BSI)" & "Bureau Veritas" for

Implementation & Certification of ISO 46001:2019 @ Hirakud Power

## **Energy Monitoring**

Well Established Energy Management Cell headed by DH-CPP.

Daily monitoring of Heat rate and Aux. power deviation report.

Analysis of equipment performance for deviation.

Identification of energy conservation scope.

Theme base suggestions/Kaizens scheme under "Energy Saving".

Feasibility study of suggestions & submit proposal for sanction.

Preparation of detail action plan.

Weekly review to monitor project progress.

Benefits analysis after project implementation.

Sustainability of the project

## **Energy Monitoring**

## Digitalization Initiatives

	Digitalization Project List for Hirakud Power								
S. No.	Project List	Status							
1	Digital Twin implementation at unit-4 and scale-up in Hirakud Power	Implemented successfully and potential savings observed in Last Quarter of FY-21 was 4 Lacs. Now Scaling up Digital Twin in other 4 units also.							
2	Coal Supply Chain Tracking System	HHD is used for driver & vehicle registration, vehicle inspection, Blend tool run already started. RFIDs to be installed in 5000 trucks.							
3	VEDA implementation for the Hirakud with GDNA for Post Covid 19 solutions	Plan to implement till Dec-21							
4	Real Wear device for Remote Assistance	Deployed during Covid-19 for remote assistance and saved the logistic cost around 1.5 lacs in FY-21							
5	Augmented reality development for the Hirakud	<ul><li>1.Built Boiler Lit-Up AR Model for Learning purpose.</li><li>2.Motor dismantling Model under progress.</li><li>3.Barring gear assembly model under progress.</li></ul>							
6	Safety Kiosk installation at Power plant main gate	Installed for Visitors safety training and gate pass							
7	KPI data monitoring of Hirakud Power through Android application.	Installation complete and all stakeholders are using for KPI Monitoring							
8	Volumetric Coal Stock measurement by drone	After POC will go for purchasing the drone							
9	Advance Process Control revival in Boiler-7	After site survey and monitoring potential benefits order will release.							
10	Remediation of Cyber Security deficiency on OT Network at Hirakud Smelter and Power	Techno-commercial discussion with all stakeholders							
11	Online CBM solution using IOT enabled vibration sensors	Under progress							
12	Confined space monitoring (RFID card punching, 24*7 Gas detection )	Planning for POC (5 days)							

## **Plantation Details**

YEAR	NO. OF SAPLINGS PLANTED	SPECIES PLANTED
Up to 2006 – 07	419865	
2007 – 08	33,000	Chakunda, Gambhari, Sisam, Krushna Chuda, Radha Chuda, Jammun & Neam
2008 – 09	25,200	Chakunda, Gambhari, Sisam, Krushna Chuda, Radha Chuda, Jammun & Neam
2009 – 10	31,000	Chakunda, Gambhari, Sisam, Krushna Chuda, Radha Chuda, Jammun & Neam
2010 – 11	30,000	Chakunda, Gambhari, Sisam, Krushna Chuda, Radha Chuda, Jammun & Neam
2011 – 12	25,200	Chakunda, Gambhari, Sisam, Krushna Chuda, Radha Chuda, Jammun & Neam
2012 – 13	25000	Neam, Karanja, Sisam, Krushna Chuda, Radha Chuda, Cassia Fistula, Alstonia & Kadamba
2013 – 14	30000	Neem, Karanja, Sisam, Cassia Fistula, Alstonia, Kadamba, Mango, Jamun etc
2014 – 15	12000	Neem, Karanja, Sisam, Cassia Fistula, Alstonia, Kadamba, Mango, Jamun etc
2015 – 16	10000	Bamboo, Sisoo, Karanja, Alstonia, Chhatiana, Mango, Jamun etc
2016 – 17	21175	Bamboo, Ficus, Alstonia, Champa, Plumeria Alva etc
2017 – 18	13500	Krushnachuda, Radhachuda, Acassia, Ficus, Jamun, Arjun, Ashok etc
2018 - 19	10500	Bamboo, Sisam, Cassia Fistula, Alstonia, Kadamba, Mango, Jamun
2019 - 20	8400	Alstonia, Champa Bamboo, Sisam, Alstonia, Kadamba, Mango, Jamun
2020 - 21	1058	Arjun, Radhachuda, Krushnachuda, Jamun,Ficus, Debdaru, Baula
Total	695898	

## **Green Belt Cover @Hindalco**

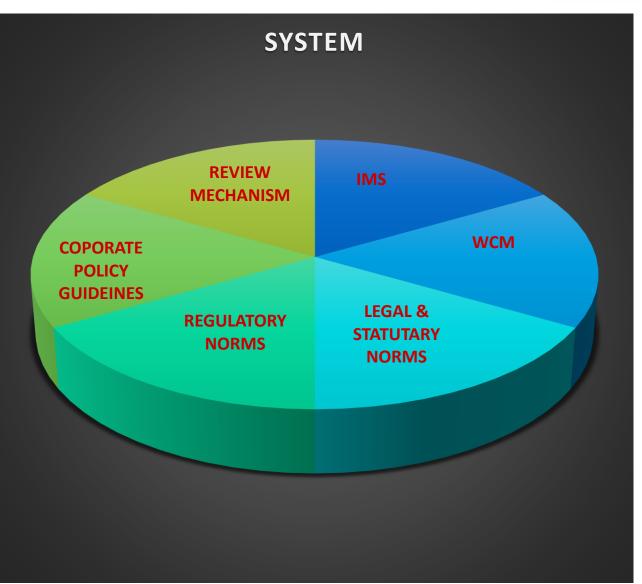

## Systematic Approach

Certification	Year
ISO 9001	2008, 2015
ISO 14001	2004, 2015
ISO 18001	2007
ISO 45001	2017
ISO 50001	2015, 2020

## Maintenance & Reliability:

#### **Advanced Condition Monitoring**

Condition monitoring activities transformed into many folds, by using ultrasonic technology, thermography.

#### Performance Monitoring & Gap Analysis

Monthly TG, Boiler & equipment's performance monitoring as per standards ASME PTC 4.0 for gap analysis and suggesting improvement plan.

#### Maintenance KPI

Monitoring KPIs i.e., EEA, MTBF, PM compliance on monthly basis and tracking and monitoring all major equipment's maintenance with proper review

#### Shutdown / Overhauling Monitoring

Review of every major shutdown & overhauling with deviation and gap analysis thru Grant Chart for better execution.

## Maintenance & Reliability:

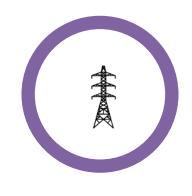

Ultrasonic Technology

**SPM Technology** 

**Lube Oil Analysis** 

Thermography HT Side Testing

- Compressed Air Audit
- Partial discharge/ arching/tracking
- Air Ingress/
  Valves & Drains
  passing
- Flow measurement

- Vibration Monitoring
- Advanced analytics
- Dynamic Balancing
- Motor Current
  Signature
  Analysis

- Mechanical Impurities
- Viscosity Testing
- NAS
- Moisture
- > TAN

- Hot Spot
- **Boiler Insulation**
- Bearing
- Terminal Box

- Tan Delta
- DGA
- LA 3<sup>rd</sup> Harmonic
- PID Testing
- Contact
  Resistance
  measurement

## Maintenance & Reliability:

C No	Duoingh Name	Catagomy	Block Cost	Shahue
S No	Project Name	Category	(In Lacs)	Status
1	Unit # 1 Heat rate improvement and capacity Upgradation	Heat Rate Improvement	4000.00	Enquiry given to BHEL, GE and Siemens. All inputs provided to Vendors as per their requirement. M/s Siemens and M/s GE visited Hirakud. Offer expected by 10 <sup>th</sup> August. CP to be raised by 20 <sup>th</sup> August.
2	TG#2 Overhauling along with replacement of GBC#6 for PHR improvement	Heat Rate Improvement	992.00	Planned in Oct'21
3	Unit 5 Turbine capital Overhauling	Heat Rate Improvement	739.00	Planned in Feb'22
4	Installation of 6nos Micro pulse for Stack emission reduction in Unit-2, 3 & 4	Sustainability	699.00	CP Raised on 1st Jun 2021, under approval.
5	Addition of ECO-1 Coil in Boiler #6	Heat Rate Improvement	250.00	Techno-commercial offer received from OEM i. e TKIIPL. CP to be raised by 5 <sup>th</sup> Aug
5	Installation of De Sox Systems to meet Boiler flue gas Sox emission as per MOEFCC norms by limestone injection	Sustainability	2900.00	Civil foundation work for Unit- 4&5 is under progress. Unit - 2&3 excavation under progress.
6	Tower Diversion at Ash dyke	Sustainability	668.00	17/19 tower foundation & erection completed. Work under progress for 18th. Target completion-Dec-21
7	Installation of screen in Unit# 3 Secondary Crusher houses to control coal fines and improve Boiler Efficiency	Heat Rate Improvement	200.00	PO confirmed to Thermax.
8	Coal Sampling Shed through Augur mechanism	Sustainability	175.00	Foundation job complete. Fabrication completed by 75%. Peripheral drain job is under process. Structural erection will start after getting crane at site. Target completion- Dec-21, Supplementary CP raised for additional approval
9	Installation of Raw Water Pumping Station inside CPP	Sustainability	169.00	Pump received civil work to be started
10	3rd raw water pipeline	Sustainability	200.00	1.2 km completed out of 1.7 km. Waiting for clearance from legal department for resumption of the work.

## Asset Management:

Warranty card for all the critical equipment's.

**Standardization & Development of OPL format / MP Design Formats** 

Model area Identification, development action plan, criteria, system / process implementation.

Several new equipment of NDT are introduced for better break down analysis & condition monitoring.

03 No of RCM projects has been successfully completed i.e. Boiler Feed pump (2B), Secondary crusher & Intermediate silo

Training on RCM has been given to total 06 person as on day.

10 No of job has been handed over to operation for Autonomous Maintenance.

Asset Criticality Review, Asset Record & Tag no display on every equipment.

Digitalization of all documents & drawings,

Strengthening of PM & CM through On-line (Oracle),

Skill level enhancement on Problem solving tools, Improvement in MTTR & MTBF.

Optimization of Inventory level, Strengthening of Ownership Culture, Model area development, Reliability Centered Maintenance.

## R&D @ Hirakud – Summary of Brain Storming

#### Nos of Improvement ideas captured Post Brainstorming Session with Cross Functional Team Members

Sr no	Area	Reliability	Safety	Sustainability	Performance	Operation flexibility	Cost Saving	Total Projects	Approved project from List	High priority	Medium priority	Low priority
1	Boiler	15	1	6	4	2	2	30	6	5	13	11
2	Turbine	5	3	0	7	0	6	21	4	6	9	5
3	CHP	7	1	2	2	1	0	13	3	2	5	7
4	AHP	4	1	2	2	1	0	10	3	1	6	4

8	Electrical	30	2	1	3	0	3	39	16	4	22	13
9	CPP	7	1	6	1	0	0	15	2	4	7	4
10	Inst	11	1	1	1	2	0	16	12	0	11	5
11	Others	1	0	0	0	1	0	2	0	0	1	1
	Grand Total	87	16	25	26	8	18	180	55	24	84	72

#### Research & New Initiatives @ CPP Hirakud

Project #1 – Black Start DG (Project Cost: Offers Awaited)

Project #2 – New Turbine Rotor(Siemens) (Project Cost: 50 Crs)

Project #3 – Installation of 300 TPH CFBC Boiler in place of Boiler#2 (Project Cost: 100 Crs)

Project #4 – Capacity Enhancement of Emergency Reservoir (Project Cost: 10 Crs)

Project #5 – Achieve PM Emission Level up to 30 mg/Nm3 (Project Cost: 25 Crs)

Project #6 – Capacity Enhancement of RO Plant (Project Cost: 15 Crs)

Project #7 – Double Bus System for Main Receiving Station. (Project Cost: 30 Crs)

Project #8 – New Coal Yard (Project Cost: 5 Crs)

Project #9 – Unit#3 & 4 Main Steam Header Interconnection (Project Cost: 20 Crs)

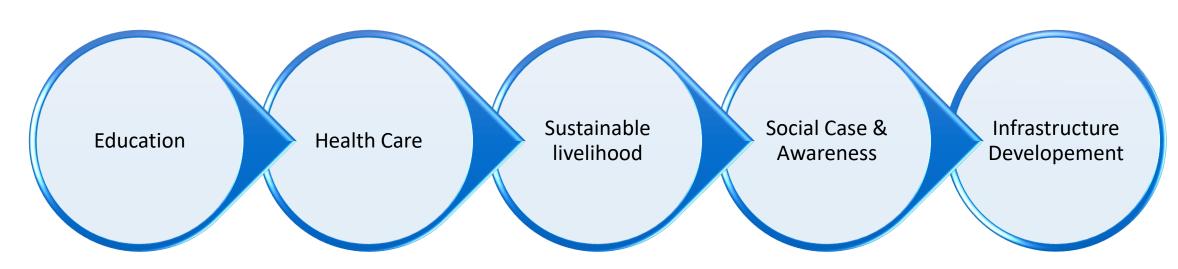

- Hindalco, Hirakud works in 23 villages, which are under Dhankauda block of Sambalpur Districts in the state of Odisha. We have reached out to a rural Population of about of 46145 till March2021 (2020-21).
- During the financial year 2020-21 a total of Rs. 315.50 lakhs has been expensed for CSR activities where our contribution is Rs. 202.50 lakhs and Rs.113.00 lakhs has been mobilized from Govt. & other sources.

#### **Our focused interventions are in the field of:**

**Scholarship to Meritorious Students** 

**Immunization Programme** 

**Family Planning Camp** 

#### 5. Eye Screening & Cataract Operation Camp:

**Eye Screening & Cataract Operation Camp** 

#### 9. Awareness on COVID-19:

#### 8. Pulse Polio Rally & Immunisation Programme:

12. Aditya Birla Skill Centre

CSR Budget is now more than doubled to provide service to community that were in last 5 years back. Currently the Budget is 261 Lakhs in comparison to 108 Lakhs in 5 years back.

Strengthening women empowerment activities with currently 61 SHG with 749 members with a deposit of more than 74 lakhs as well as 17 SHGs are involved in Income generation activities by taking a loan from banks in comparison to 36 SHGs in 5 years back with 6 SHGs were involved in IGP.

We are focusing more on the health care programme by organising different camps like, Eye, dental, family planning and other this year up to 3<sup>rd</sup> qtr we have done an expenditure of more than 57 lakhs in Health sector in comparison to 14.77 lakhs in the year 2015-16.

We have travelled a journey from frequent disturbance by the local villagers at our site before 2015 to zero surprises now

## Awards & Accolades

CPP-IGMC Awards in 2021

CPP -Energy Efficient Unit by CII in 2020

**CPP – Most Innovative Project by CII in 2020** 

**CEM Insight Award to CPP in 2020** 

Reprism in 2019

**Gold Award in NAMC 2018** 

# Thanks!
